

KCPL Awarded
“FROST AND SULLIVAN TECHNOLOGY LEADERSHIP AWARD”
in the Indian Industrial Paints and Coatings Market

Kirloskar Corrocoat Private Limited (KCPL) was chosen for this award after considering the following points -

1. KCPL has introduced a range of high performance coatings in India, which use glass flakes to provide corrosion resistance to heavy duty equipment used in the refineries, Off shore and onshore drilling, Power Sector, Steel and structural applications. These coatings are marketed under the brand names Polyglass and Corroglass.
2. Glass flake coatings have revolutionized corrosion protection method and have found a wide acceptance in the industry.
3. Recognizing the company's efforts in identifying the need of the right corrosion control methods for the Indian Industry and launching novel and tailor-made solutions for the same in the market, Frost and Sullivan declared the technology leadership award to KCPL.
